4-785-01 Current Monitoring Device EDD-CT

Order No.	4-785-01
Model No.	EDD-CT
JAN Code	4589638257131
Standard price	JPY: 52,000
	USD: 345.81
	Exchange rate 1USD= 150.37JPY Valid price in Japan
Quantity	1piece

Features

- By placing the unit at the root of an electrical appliance, the current transformer (CT) is used to monitor the inflow of power (1A or higher).
- By using optional LED warning lights, you can inform the entire room of the operation status.
- By extending the cable from the alarm output side, you can monitor the operating condition in a remote room.
- Prevent Forgotten Cutting of Electrical Appliances and Materials!

Spec

- Output: 100 V1A
- Size (mm): 130 x 160 x 84
- Connected capacity: AC100V VMAX 12 A (Includes output for alerts)
- Alarm side connection capacity: MAX1A
- Output control method: voltage output by SSR
- Safety function: Overcurrent protection fuse
- Power supply : AC100V 50/60Hz
- Power cord : Approximately 1.8 m (3P plug)
- Sensor type: CT (current transformer)
- Detected current value: 1 A or more
- Setting method: UP/DOWN key
- Connecting terminal: Operation output/3P outlet, alarm output/M3.5 Y terminal block
- Weight: about 1.2kg

▶ Package size : 200×175×150 mm 1.4 kg
