

Base/Washer/Clamping Spindle	Body	Handle
Steel (S45C) Quenched and tempered Black oxide finish	Steel (SCM440) Quenched and tempered Black oxide finish	ZDC1 die cast zinc Coated with paint Black

- Clamp worked by a screw-locking mechanism which allows providing longer clamping stroke and greater clamping force than a cam-locking mechanism.
- Operated by an adjustable handle that allows for flexible handle positioning.

Counterclockwise Clamping

Clockwise Clamping
