

# CS SERIES

# LOW-COST LENGTH SENSOR

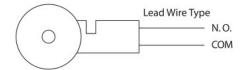

Simple structure with reed switch installed. Good for measuring the length of paper, cloth, film, etc.

by combining with an electronic counter or an electromagnetic counter.

## MODEL

Model	Sensor	Unit	Speed	Weight	Rotation Torque	Proper Counter
CS-3:1	Reed Switch	1m[yard]	500meter [yard]/minute	740g [26oz.]	15mN₊m	Electronic Counter / Electromagnetic Counter
Operating Temperature -5 - +40°C [14 - 122°F] (Non-freezing) Operating Humidity 85% max. (Non-Condensing)						
Operating Temperature		re	-5 - +40°C [14 - 122°F] (No	on-freezing)	Operating Humidity	85% max. (Non-Condensing)

#### CONNECTION

Current Rating : 50VA (maximum)

Maximum Current : 2.5A

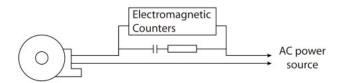

Maximum Voltage (ON/OFF) : 350VDC / 300VAC

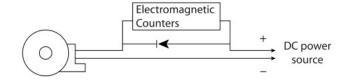

Maximum current (ON/OFF) : 0.5A

Make : 1:1 (ON 1.5 rotation, OFF 1.5 rotation)

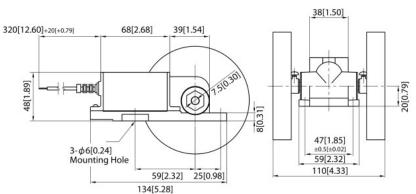

#### NOTE

- 1. For the connection with an electronic counter, use a contact input terminal.
- 2. It is recommendable to use such components as diode, CR etc., for the protection of contact in the case of connection with such inductive load as electromagnetic counter.

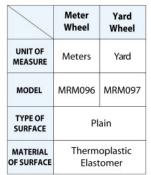

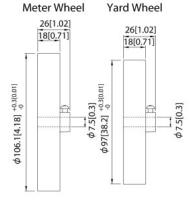

## DIMENSIONS(Unit:mm)
