Installation of USB driver

In order to communicate with a programmable controller CPU via USB, a USB driver needs to be installed.

For a USB driver installation procedure, refer to MX Component Version 4 Operating Manual.
Uninstallation

Delete the product from the personal computer.

1. Uninstall the product from the control panel of Windows.

Point

- Uninstalling deletes all the settings within "Communication Setup Utility".
  To avoid this, export the file storing the settings.

- If the following screen appears during the uninstallation procedure, click the [No to All] button.
