Slit Couplings

Extra Super Duralumin - Clamping, Set Screw, Short

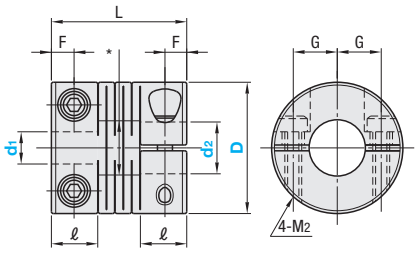
For Servo Motors

■**Features:** Due to the use of extra super Duralumin, it has high torsional rigidity and is applicable with servo motors.

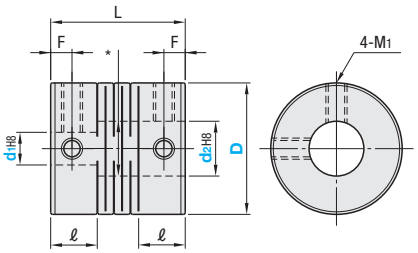
For more misalignment tolerances and higher torque capacities, see Disc Type P.1075.

■**For Servo Motors**

CPCX (Clamping)



CPSX (Set Screw)



*d1, d2 Identical Diameter = d1+0.5
d1, d2 Different Diameters = Large Shaft Diameter + 0.5

The lateral, angular, and axial misalignment values shown are for each occurring individually. When multiple misalignments are occurring simultaneously, the allowable maximum value of each will be reduced to 1/2.

For the selection criteria and alignment procedures, see P.1061.

Type	Material	Surface Treatment	Accessory
